

Long Range Rifle-2 Unknown Distance

STORM MOUNTAIN, INC.
Training Division 

Designed to enhance and sharpen the skills learned in LR1. In this course, the student is introduced to several techniques needed to master the precision long-range rifle. This course covers intermediate marksmanship techniques, range estimation, scope adjustment and theory, dialed on shots for unknown distances ranging from 200 to 1000 yds. Instruction will also reinforce the prone supported position and introduce the shooter to varying alternate positions that may be required in operational shooting situations.

Ammunition requirements: 500 rounds match grade ammunition (min).

Prerequisite: LR1.

Required equipment: Scoped non-magnum caliber rifle, bipod, 20x (min) spotting scope, data and/or log book, appropriate eye, ear, knee and elbow protection, clothing suitable for weather conditions.

Note:

1. Any non magnum rifle/caliber combination is acceptable for this course, however, the .223 or .308 is highly recommended.
2. There is a reticle requirement for this course. You must have a MILS based reticle, IE. Gen 1, Gen 2, TMR, Horus.
3. You must have either target or BDC type turrets.
4. It is strongly recommended that students contact the office and discuss with an instructor the suitability of the rifle and scope they intend to use.

Length/Cost: 3 days, \$750.

Dates: July 12-14, 2019.
