

Comprehensive Long Range Rifle Course (KD, UKD and Movers)

Designed for the novice but will progress to the advanced levels of Long Range Rifle Marksmanship. This program will train and test the operator in the use of the precision scoped rifle. (Sniper training without the tactics.) This course covers:

- Fundamentals of marksmanship
- Ballistics
- Ammunition selection and usage
- Shooting positions
- Effects of weather
- Data book set up and theory
- Team techniques
- Known distance range firing from 100 to 800 yds.
- Range Estimation
- Unknown Distance Shooting from 200 to 1000 yds.

Ammunition requirements: 800 rounds match grade ammunition.

Prerequisite: None.

Required equipment: Scoped rifle, bipod, 20x (min) spotting scope, data and/or log book, appropriate eye, ear, knee and elbow protection, clothing suitable for weather conditions.

Note:

1. Any non magnum rifle/caliber combination is acceptable for this course, however, the .223 or .308 is highly recommended.
2. There is a reticle requirement for this course. You must have a **MILS** based reticle, IE. Gen 1, Gen 2, TMR, Horus.
3. You must have either target or BDC type turrets.
4. It is strongly recommended that students contact the office and discuss with an instructor the suitability of the rifle and scope they intend to use.

Length/Cost: 5 days, \$1100.

Dates: Oct. 7-11, 2019.
